DETAILED ACTION

Page 2

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/28/05 has been entered.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-3,6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Englander (US 6636822) in view of either Foster (US 2877686) or Bateman (US 3610736).

Art Unit: 2872

Englander discloses a crossover or crossview mirror assembly for mounting on a front surface of a vehicle having a cab (see fig. 3), the mirror assembly meeting visual requirements set forth in FMVSS 111 (see col. 1) and comprising an arcuate mirror (mirror 22 is clearly arcuate due to the shown distortion) with frame and mounting support (clearly shown in fig. 3) coupled to the front of the vehicle.

Englander does not disclose a servomotor actuator controlled by an electronic controller assembly for swiveling the mirror along an x-axis about a center point to move the mirror clockwise or counterclockwise about the center point. However, these features are disclosed by both Foster (as discussed previously) and Bateman. With respect to Foster, note motor(M1,M2) and toggle-switch type controller (col. 3) which swivel the mirror along an x-axis about a tubular region center point (e.g. 19) along a horizontal plane (see fig. 3). With respect to Bateman, note motor(30) and toggle-switch type controller(39) which swivel the mirror along an x-axis about a tubular region center point (e.g. 24,25,etc.) along a horizontal Note with respect to claims 6 and 7 that since the swiveling of Foster's and Bateman's mirrors is limited, a center position may be defined midway between the clockwise-most and counterclockwise-most limits. Note also that Foster shows the

Art Unit: 2872

swiveling to be not greater than approximately 45 degrees (fig. 3) and that Bateman's limiting structure(33,34) limits swiveling to less than this value. It would have been obvious to the ordinarily skilled artisan at the time of invention to include the actuator and controller assembly of either Foster or Bateman with Englander's mirror since motorized adjustment of the mirror is more convenient and quicker than manual adjustment.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. Additionally, it should be noted that the term "crossview" is incorrectly used on line 12 of page 13 of the response.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Robinson whose telephone number is (571) 272-2319.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn, can be reached at (571) 272-2312. The fax phone number for the

Art Unit: 2872

organization where this application or proceeding is assigned is (703) 872-9306.

Page 5

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
